

Major Offered Through:

CORVALLIS

Portland Community College

Food Science and Sustainable Technologies

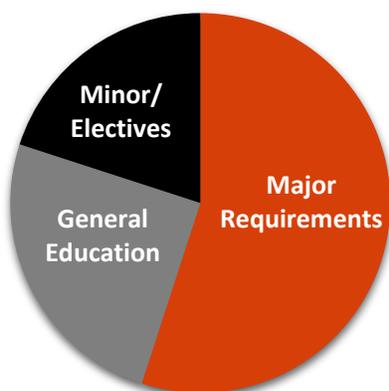

As Alton Brown says, "All food is science," and nothing could be truer. Food science, and related technologies, are at the heart of the development and delivery of safe, appealing and convenient food products, at every step from the farm gate to the food marketer. The academic program integrates principles and concepts in the physical, biological and engineering sciences, and applies them to the scientific and technological aspects

of food processing. Graduates are well prepared to address the complex undertaking of assuring an abundant, high quality, nutritious and sustainable food supply.

Options available:

- Enology and Viticulture
- Fermentation Science
- Food Science
