

United States Department of Agriculture

Agricultural Research Service

The USDA, Agricultural Research Service, Range and Meadow Forage Management Research Unit located in Burns, OR, is seeking a full time, permanent, Biological Science Technician. The salary for this position is at the GS-5-9 level, \$37,696 - \$74,250 per year. The mission of this Unit is to provide the scientific basis for sound land and livestock management on sagebrush rangelands. The individual selected will assist in a range of field and computer-based work as part of a collaborative team focused on applying geospatial technologies to rangeland management. Major duties will involve field data collection using common vegetation monitoring techniques and the opportunity to learn to use and process cutting-edge geospatial technologies (e.g., drones with multispectral, thermal, and hyperspectral sensors) on projects ranging from wildfire fuels monitoring, invasive plant species detection, species diversity, forage quality, and plant ecophysiology. **This announcement will open 11/29/2023 and will close on 12/12/2023.** This position is open to US Citizens or US Nationals. USDA/ARS is an equal opportunity provider and employer.

If you have any questions regarding the additional duties of this position please contact Dr. Peter Olsoy at 206-331-0297 or peter.olsoy@usda.gov.

If you have any questions regarding the application process for this position please contact Juliana Hensley, Staffing Specialist, at juliana.hensley@usda.gov.
